

Taighde Éireann Research Ireland

Research Ireland REVIEWER CODE OF CONDUCT

Research Ireland offers a range of funding schemes which support researchers to deliver both research excellence and impact. The use of international independent Reviewers is an integral part of Research Ireland's decision-making process. The purpose of external review is to gather expert evaluations from appropriate field experts so that Research Ireland can make an informed decision regarding a proposal.

Review panels are comprised of Reviewers with specific subject matter expertise who also possess broad knowledge of the sub-fields relevant to the proposals to be reviewed. For the specific evaluation of potential impact, Reviewers will be identified with expertise in research translation, commercialisation and with industry experience and/or experience in collaboration with industry.

Reviewers assist in the process and make funding recommendations but do not make funding decisions. The final responsibility for evaluation and award decision lies with Research Ireland.

Reviewers engaged by Research Ireland are required to abide by the following code of conduct:

1. Reviewers appointed by Research Ireland are required to operate in a confidential, fair, independent and equitable manner according to the procedures described in this code of conduct, in any programme-related documentation and by any other instruction(s) communicated by Research Ireland.
2. Reviewers are appointed as independent experts and are deemed to work in a personal capacity and, in performing the work, do not represent any organisation.
3. An essential part of ensuring research integrity is managing **conflicts of interest** that may bias the review of an application. Research Ireland staff are charged with identifying appropriate Reviewers and managing reviewer conflicts of interest. Reviewers must agree to sign a declaration of absence of conflict of interest before conducting a review. If a reviewer is in some way connected with a proposal or has any other allegiance which impairs or threatens to impair their impartiality with respect to a proposal, they must declare such facts to the responsible Research Ireland staff member(s) as soon as they become aware of this. If a Reviewer is unsure as to whether a conflict of interest exists, they should consult with the appropriate Research

Ireland staff member(s). If a potential conflict of interest arises during a review process, a reviewer must alert the relevant Research Ireland staff member to this, and the situation will be managed appropriately.

4. Reviewers must agree to certify a declaration of **confidentiality** (in the Conflict of Interest and Confidentiality Statement) prior to conducting a review. Reviewers must not copy, quote, or otherwise use or disclose to anyone, including their own graduate students or post-doctoral or research associates, or input into generative AI tools, any unpublished material from any programme they are asked to review. If reviewing proposals, they must keep confidential the name of the applicant and the evaluation conducted. Reviewers must not disclose their identities, the relative assessments or rankings of proposals by a peer review panel, or other details about the peer review of proposals.
5. Reviewers are required to perform all activities undertaken for Research Ireland with reasonable skill and care and to the best of their ability, upholding the highest standards of integrity.
6. Reviewers must undertake all activities in a personal capacity and must not delegate or sub-contract the performance of any activities or part thereof to graduate students, post-doctoral or research associates or any other third parties, or use generative AI tools to undertake such activities.
7. Reviewers are required at all times to comply with generally accepted rules of good research practice in carrying out their review and in their professional conduct in general, including any specific code of practice notified by Research Ireland to Reviewers from time to time.
8. Reviewers may not communicate with proposal applicants at any stage unless they are required to do so as part of the evaluation process (for example, if an interview or site visit forms part of the evaluation process). In cases where Reviewers are required to communicate with applicants as part of the evaluation process, communication must only happen in the presence of Research Ireland staff members.
9. Reviewers are required to respect the intellectual property of applicants and may not appropriate and use as their own, or disclose to any third party, any and all intellectual property rights of any nature, whether registered, registerable or otherwise, including patents, utility models, trademarks, registered designs and domain names, applications for any of the foregoing, ideas, concepts or data contained in any proposals (“Intellectual Property Rights”).

The Intellectual Property Rights in all materials provided by an applicant shall remain vested in and shall be the absolute property of the applicant or its third-party licensors.

- 10.** In cases where proposals are to be made available to Reviewers, who then work from their own or other suitable premises, the Reviewers will be held personally responsible for maintaining the confidentiality of any documents or electronic files sent and returning, erasing or destroying all confidential documents or files upon completing the evaluation. In such instances, Reviewers may seek further information (for example through the internet, specialised databases etc.) in order to allow them to complete their examination of the proposals, provided that obtaining such information respects the overall rules for confidentiality and impartiality. Reviewers may not show the contents of proposals or disclose information contained therein to third parties without the express written approval of Research Ireland.
- 11.** Where the evaluation takes place in an office or building controlled by Research Ireland, Reviewers are not permitted to take outside the evaluation building any parts of proposals, copies or notes relating to the evaluation of proposals.
- 12.** Reviewers are required at all times to comply with any rules defined by Research Ireland for ensuring the confidentiality of the evaluation process and its outcomes, including as set out in this Research Ireland Reviewer Code of Conduct and Research Ireland's Reviewer Conflict of Interest and Confidentiality Statement. Failure to comply with these rules may result in exclusion from the immediate and future evaluation processes, without prejudice to penalties that may derive from other applicable regulations.
- 13.** Reviewers must agree that Research Ireland may use Research Ireland's online Grants and Awards Management System (SESAME, or any other online grants and awards management system as adopted by Research Ireland) as a means of communication between Reviewers and Research Ireland or to deliver materials for review by reviewers. In such case, Reviewers will be able to access Research Ireland's online Grants and Awards Management System from any computer with their email address and password.
- 14.** You confirm that you have read, understood, and adhere to Research Ireland's policies, including its Privacy Policy, available on the Research Ireland website. Research Ireland may change its policies or introduce new policies at any time and will notify Reviewers by email of any changes or new policies.
- 15.** Research Ireland may from time to time in the course of its dealings with Reviewers and complying with its legal obligations, need to process personal data (including Special Categories of Data, such as information relating to your health) in relation to you. Research Ireland will process such data in accordance with Data Protection Law. Further details in relation to what personal data is collected in relation to Reviewers, and the purposes for which such data are used and may be disclosed by Research Ireland, are set out in the Privacy Policy.
- 16.** You acknowledge the processing of your personal data, (including of Special Categories of Data), by Research Ireland and the disclosure of your data, if

necessary, as described in Research Ireland's policies, including the Privacy Policy.

17. To the extent that membership of a Review panel or the performance of activities as a Reviewer involves the processing of personal data on behalf of Research Ireland, Reviewers must process the personal data solely in connection with the review, or as otherwise instructed by Research Ireland, and in compliance with Data Protection Law and Research Ireland's policies, including the Privacy Policy. Any breach of Research Ireland's policies may result in Research Ireland revoking membership of the relevant Review panel.
18. Reviewers must agree to act justly in conducting a review for Research Ireland. A review must be conducted with integrity, impartiality and confidentiality and without bias on the basis of gender, race, colour, age, disability, national origin, sexual orientation, political or religious affiliation, or marital status. Reviewers are requested to review and consider the guidance provided to aid reviewers in the understanding of unconscious bias and the goals of Research Ireland in the video available on the Research Ireland website (<http://www.researchireland.ie>), as well as the [Research Ireland External Equality, Diversity, and Inclusion Strategy 2023-2028](#).
19. In this contract:

“Data Protection Law” means all applicable data protection law, including on the date hereof the Data Protection Acts 1988, 2003 and 2018 and any legislation which amends, extends, consolidates, re-enacts or replaces same, including the General Data Protection Regulation (Regulation (EU) 2016/679) with effect from 25 May 2018.

“Special Categories of Data” means either sensitive personal data as defined in the Data Protection Acts 1988, 2003 and 2018 or special categories of personal data as defined the General Data Protection Regulation (Regulation (EU) 2016/679), as appropriate. Research Ireland may from time to time in the course of administering its business and exercising its legal obligations need to process personal data (including Special Categories of Personal Data, such as information relating to your health) in relation to you.
